DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 8-14, 16-21, 24-31 and 33-36 drawn to a method for treating non-dementia mental disorders, and the composition employed therein.

Group II, claim(s) 1-17, 22, 23, 26, 27, 32 and 33 drawn to an method for treating dementia, and the composition employed therein.

2. The inventions of Groups I and II represent separate and distinct methods. They differ with respect to host, method steps and final results. Particularly, they are directed to two distinct groups of mental disorders which involve different etiology, symptoms. They therefore have different issues regarding patentability and enablement and represent patentable distinct subject matter, and lack a common core technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1617

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) The cyclic glycerophosphate compounds as defined in claims 8, 16, 26, or 36;
- b) Particular mental disorders.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
